DETAILED ACTION

1. Claims 1-8 are now pending.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

4. The disclosure is objected to because it lacks the proper subheadings, e.g., Background of the Invention, Brief Summary, etc. Appropriate correction is required.

Citation of Relevant Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Iwasaki et al. (US 5,740,149) disclose a phase-change type optical recording and reproducing method. Figure 9 shows a relationship between a pulse parameter y and amount of jitter.

Matsumoto (US 2002/0105874) discloses an optical disc apparatus with regulation of recording velocity and laser power. Figure 4 shows a graph for determining an optimum recording power using test recording for three different velocities.

Kakimoto et al. (US 2005/0243670) disclose (see Figures 8A & 8B) determining a value of optimum recording power in response to whether or not a minimum value of a valley pattern is less than a threshold level.

Allowable Subject Matter

6. Claims 1-8 are allowed over the prior art of record.
7. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record, alone or in combination, fails to teach or suggest: in claim 1, a method of determining a value of a recording pulse parameter for optical record carrier recording, where recording pulses are applied to a recording surface of the optical record carrier for writing a pattern of optically readable marks on the record carrier, said method comprising: writing test patterns with pre-determined values of the recording pulse parameter, said values

Art Unit: 2627

being different for each test pattern; and reading the test pattern and forming a read signal; and measuring jitter values of the read signal corresponding to each test pattern; and forming a dependence of the jitter values versus the pre-determined values of the recording pulse parameter, where two substantially monotonous parts of the dependence are distinguished, each of the substantially monotonous part is approximated with a linear function and an intersection of the linear functions is determined in order to derive an optimised value of the recording pulse parameter.

Claims 5 & 7 have similar allowable features as claim 1.

Claims 2-4, 6 & 8 are dependent upon allowed base claims.

8. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Conclusion

9. This application is in condition for allowance except for the formal matters noted above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
